SUMMARY

Backend-focused Node.js and NestJS Developer with 5+ years of experience designing scalable REST APIs, modular backend architectures, and SaaS platforms across restaurant tech and healthcare domains. Proven ability to own backend systems end-to-end — from API design and database modelling to third-party integrations and performance optimisation — with supporting frontend delivery in React.js and Angular.

TECHNICAL SKILLS

Languages	JavaScript (ES2020+), TypeScript (strict mode)
Backend	Node.js · NestJS · Express.js · REST API Design · JWT Authentication · Middleware · RBAC
Databases	PostgreSQL · MySQL · MongoDB Schema Design · Query Optimisation
Frontend	React.js · Angular · RxJS · Next.js
Cloud & Tools	AWS S3 · Git · Postman · Vercel
Architecture	Layered (Controller–Service–Repository) · Modular Design · MVC · Multi-tenant SaaS

PROFESSIONAL EXPERIENCE

Freelance | Self Employed

Dec 2025 – Present

Remote · Full Stack Developer

- Built a clinic website for a Jaipur-based orthopaedic practice in Next.js with a custom design system and appointment enquiry flow.
- Currently building QRvana, a QR code SaaS for small businesses — independently designed the full product architecture, design system, and backend schema using Next.js, Supabase, and Drizzle ORM.

Jiak Technology

Jun 2025 – Nov 2025

Singapore · Remote · Senior Software Engineer

- Refactored monolithic backend into a scalable three-layer architecture (controller–service–repository), improving separation of concerns, maintainability, and testability across the codebase.
- Architected and delivered RESTful Analytics APIs for Reservation and Customer Insights modules, powering real-time business metrics for restaurant operators.
- Built backend modules for Brands, Digital Menus, and Business Management, supporting full CRUD operations and dynamic restaurant configuration.
- Implemented JWT-based authentication and RBAC, and developed Floorplan APIs for dynamic multi-location restaurant layout management.

Dev Technosys Private Limited

Jan 2023 – May 2025

Jaipur, India · Full Stack Developer

- Integrated Google Reserve APIs into a multi-tenant SaaS platform with OAuth flows and webhook handling, achieving full compliance and reducing deployment cycles by 20%.

- Re-architected Floorplan Management as a server-rendered Node.js module, reducing page load time by 50% and improving reliability under concurrent load.
- Designed and integrated AWS S3 document storage with access control policies, reducing retrieval latency by 30% and enabling secure, scalable storage for patient records.
- Owned end-to-end backend API delivery for multiple modules — from schema design and endpoint architecture to error handling and client-facing documentation.

Dev Technosys Private Limited

Dec 2021 – Dec 2022

Jaipur, India · Angular Developer

- Cut initial page load time by 40% by replacing full-dataset rendering with on-demand infinite scrolling using ngx-infinite-scroll and pagination APIs.
- Reduced application bundle size and improved startup performance by implementing lazy loading for all Angular feature modules.
- Built a real-time reactive filter component using RxJS BehaviorSubjects, enabling instant UI updates across complex data views without page reload.

Webdunia

Jun 2019 – Feb 2020

Indore, India · Associate Software Engineer

- Contributed to frontend and backend development of a Net Banking Application using Angular, handling UI components, API integration, and business logic.
- Built a Three.js-based 3D application with JavaScript authentication, demonstrating early full stack exposure.

PROJECTS

Jiak · *jiak.sg (formerly live)*

Multi-tenant restaurant management SaaS — analytics APIs, digital menus, floorplan management, and RBAC. Built during tenure at Jiak Technology, Singapore.

Node.js · PostgreSQL · React.js · JWT · REST APIs

Doctolink · *doctolinkapp.com*

Appointment and document management platform for clinics — scheduling APIs, MySQL data models, AWS S3 document storage, and integrated React frontend for patient workflows.

NestJS · MySQL · AWS S3 · React.js

Wishkeeper · *wishkeeper.com.au*

Data-driven UI components and structured document management interface for a production Angular application.

Angular · TypeScript

Finch Films · *finchfilmart.com*

Dynamic inventory tracking interface with real-time filtering and structured data views.

Angular · TypeScript

EDUCATION

Arya College of Engineering & I.T.

2015 – 2019

B.Tech in Computer Science
